Author of *THRYMSA* | The Inner Realms Series

Stephanie Creech writes speculative fiction exploring hidden systems, emerging technologies, and the fragile institutions humans build to govern a complex world. Her debut novel *THRYMSA* launches *The Inner Realms*, a story universe about hidden civilizations beneath Earth's most extreme environments and the geopolitical consequences when those worlds begin to emerge.

About the Book

THRYMSA is a geopolitical science fiction novel set beneath the Arctic ice. When a hidden civilization reveals itself to the world, humanity must confront a possibility it never expected: what if we were never the only civilization shaping the future of this planet?

“Science fiction allows us to explore the systems shaping our world at a scale that ordinary politics cannot. The most interesting questions are not about technology itself—but about how civilizations choose to use it, and whether they can learn to share a planet before it’s too late.”
